

Waterproof grease

Description

Cimcool Center Saver is a special waterproof grease.

Application

Cimcool Center Saver is designed as a lubricant for centres on lathes, grinders, hobbing machines etc.

Features and benefits

- The extreme pressure (EP) lubricants cut down friction between the workpiece and centre, reducing wear and energy losses.
- Easy tube application - quick, cuts waste, lubricant stays clean.
- Cimcool Center Saver retains a high viscosity under conditions of increased temperature and shear, thus remaining within the site of application. Cutting fluids will not wash it away.
- Waterproof - also lubricates and waterproofs bearings, pumps, home and shop tools.
- Ideal for sealing sliding surfaces and so preventing the onset of anaerobic (black) corrosion of ferrous materials.
- Universal application - can be used on both ferrous and non-ferrous metals.
- Convenient - individual 2 oz. tubes of Cimcool Center Saver can be supplied to each machine operator.

Method of Application

Use undiluted.

Handling and Storage

Store and use at normal room temperature.

Packaging

Available in cartons of twenty-four 2-oz. tubes.

5 US gallon container.

Safety Data Sheets

The Material Safety Data Sheet should be consulted for specific information and information on health and safety when handling this product.
